Sahand Mirzaee (SahandM96)

Founder & Full-Stack Software Engineer | Iran | sahandm96.com | github.com/SahandM96 | linkedin.com/in/sahandm96

Professional Summary

Founder and full-stack software engineer with 10+ years of experience building production web services and mobile-integrated product workflows. Specialized in FastAPI backend systems and Flutter mobile architecture, with a focus on API contracts, authentication flows, and maintainable delivery. Building GameMap as an integrated platform for apps, games, and shared backend services.

Highlighted Achievements

- Built and integrated Darooban mobile workflows using Flutter and backend APIs.
- Implemented key Zendegi Rangi product flows with stable API connectivity and user-centered mobile UX.
- Worked as Developer at 4Charkh (Dec 2017 to Oct 2021), contributing to product features and service-side implementation.
- Integrated GameMap and Memory Game flows with consistent authentication/session handling across services.

Core Skills

Python, FastAPI, Pydantic, Async SQLAlchemy, Flutter, Dart, REST API Design, Auth & Session Flows, Next.js, TypeScript, PostgreSQL, Redis, Docker, CI/CD

Experience

Application Developer at IGket (Jan 2023 to Present)

- Develop and improve app/service features with practical engineering trade-offs.

Senior Software Developer at Dox (Jun 2021 to Present)

- Build and maintain product-facing web services, backend/frontend integrations, and delivery processes.

Software Developer, Freelance (Sep 2020 to Present)

- Delivered product features for Darooban and Zendegi Rangi apps with end-to-end mobile/API implementation.

Developer at 4Charkh (Dec 2017 to Oct 2021)

- Built product features and aligned client/backend integration needs in the engineering team.

Education

M.Sc., Computer Architecture

B.E., Information Technology

Associate Degree, Computer Networks

Languages

Persian (Native), English (Professional working proficiency)
